

MUHAMMAD FARAZ

Python Developer | AI Engineer

Lahore, Pakistan | +92 341-1019063 | kazmitech142@gmail.com

PROFESSIONAL SUMMARY

Aspiring AI Engineer and Python Developer with a strong passion for building practical, real-world solutions through technology. Actively developing skills in Python to strengthen problem-solving and analytical abilities, while exploring Artificial Intelligence and Machine Learning to integrate intelligent features into applications. Committed to continuous learning, improving technical expertise, and gaining real-world experience, with the goal of becoming a skilled professional who can design and develop impactful, efficient, and innovative solutions.

TECHNICAL SKILLS

Languages: Python

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, Flask, FastAPI

ML & Analytics: Regression, Classification, NLP, Recommendation Systems, EDA

Databases: SQL (MySQL), Firebase, Supabase, Mongo DB

Tools: Google Collab, VS Code, Git, GitHub, Slack

Soft skills: Communication | Discipline Critical Thinking | Adaptability | Attention to Detail

PROJECTS

House Price Prediction

- Developed ML models for real estate price estimation using regression techniques

Plant Disease Detection System

- Designed and implemented a Convolutional Neural Network (CNN) model for image-based plant disease classification with Python, TensorFlow, and deep learning techniques.

Multi Turn AI Chatbot with Llama3

- Developed a conversational AI chatbot with FastAPI/Flask, SQLite, and LLaMA 3 API integration featuring multi-turn conversations, chat history, and analytics.

EDUCATION

BS Computer Science | March 2023 – March 2027

Virtual University of Pakistan
